# Playlists auto-created by DISCO

Last Modified on 10/14/2026 12:55 pm PDT

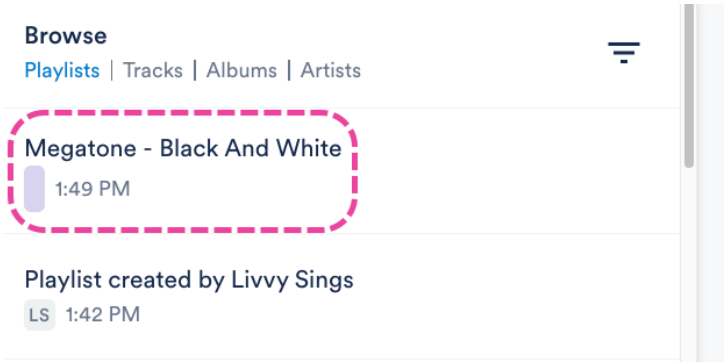

DISCO used to have a feature where Playlists could be auto-created based on your Track metadata. This feature has been deprecated, but some older accounts may still see auto-created Playlists in their DISCO.

## At a glance

When this feature was enabled, a Playlist was created automatically when you uploaded two or more tracks with the same Artist and Album metadata.

Because these Playlists weren't created by a user in your DISCO, they look a bit different (there's no user listed under the title):

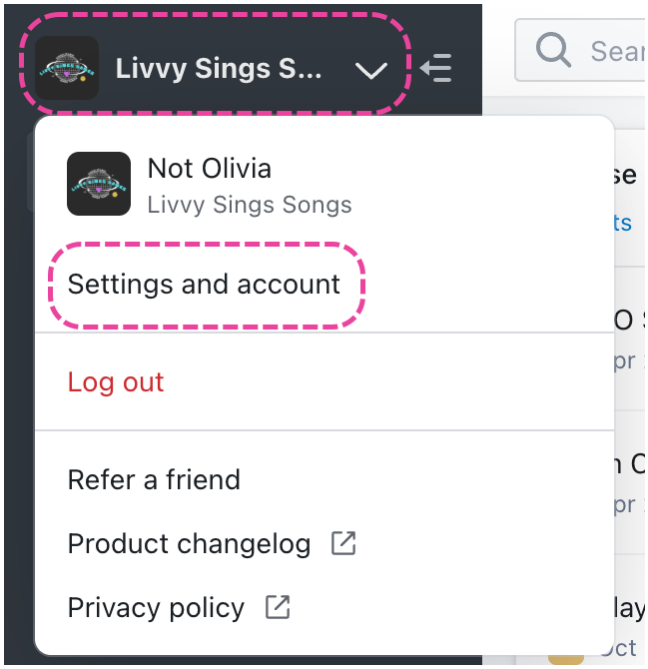

But otherwise, they work just the same as any other Playlist: you can edit, share, and delete them.

## Hiding auto-created playlists

If this feature was enabled on your DISCO at one point, but you'd prefer not to see these Playlists, you can hide them:

1. In the top-left corner of your DISCO, click on your DISCO Business Name to open the menu.

2. Select **Settings and Account**.

3. Under **My Settings** select **Display Settings** and check the box to **Hide auto-created album playlists**.
