Creating Playlists

Last Modified on 10/14/2026 12:55 pm PDT

Playlists are a great way to organize and share your music!

At a glance

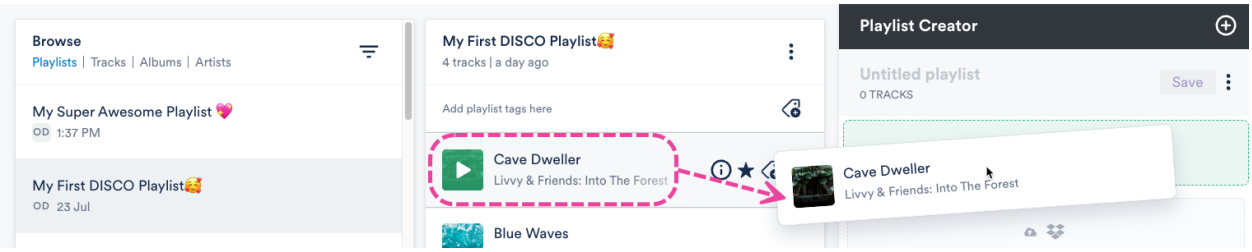

Playlists are like customizable one-page websites with unique URLs that can be shared with recipients for streaming and/or downloading your Tracks.

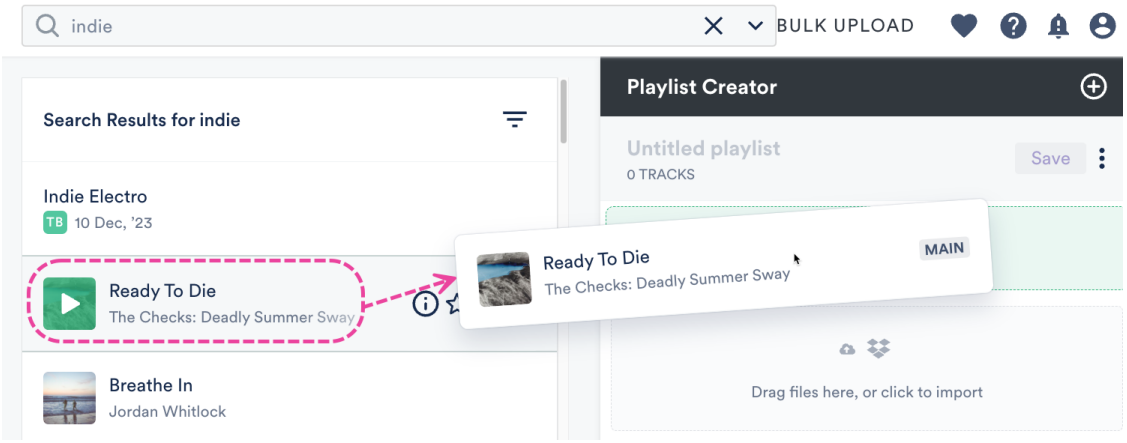

You can create Playlists from existing Tracks in your DISCO, or right after uploading new Tracks to your DISCO.

Creating new Playlists from existing Tracks

When browsing through your DISCO, you can drag and drop existing Tracks into the **Playlist Creator** at any time to start building a Playlist.

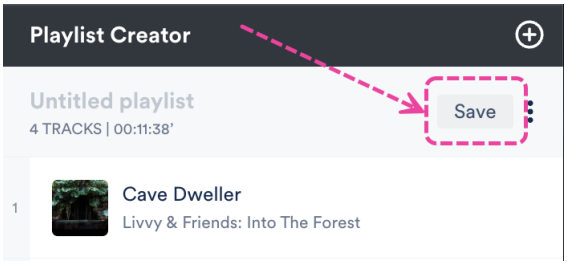

You can also use the search bar at the top of your DISCO to perform a search and then drag Tracks from the **Search Results** into the Playlist Creator.

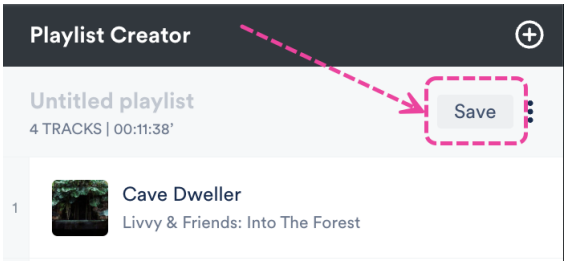

In the Playlist Creator, you have the option to add a **Name** for your Playlist, drag to reorder the Tracks, and add **Sections** to your Playlist.

When you're ready to create the Playlist, click the **Save** button.

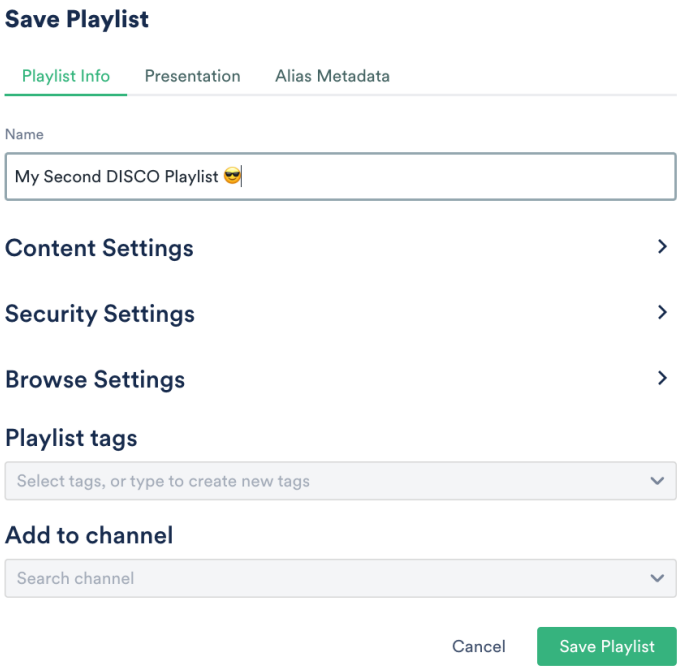

Creating new Playlists after uploading Tracks

After uploading Tracks to your DISCO, click the **Save** button in the **Playlist Creator**.

Updating Playlist Settings and saving your Playlist

After clicking the **Save** button in the **Playlist Creator**, the **Save Playlist** window will open:

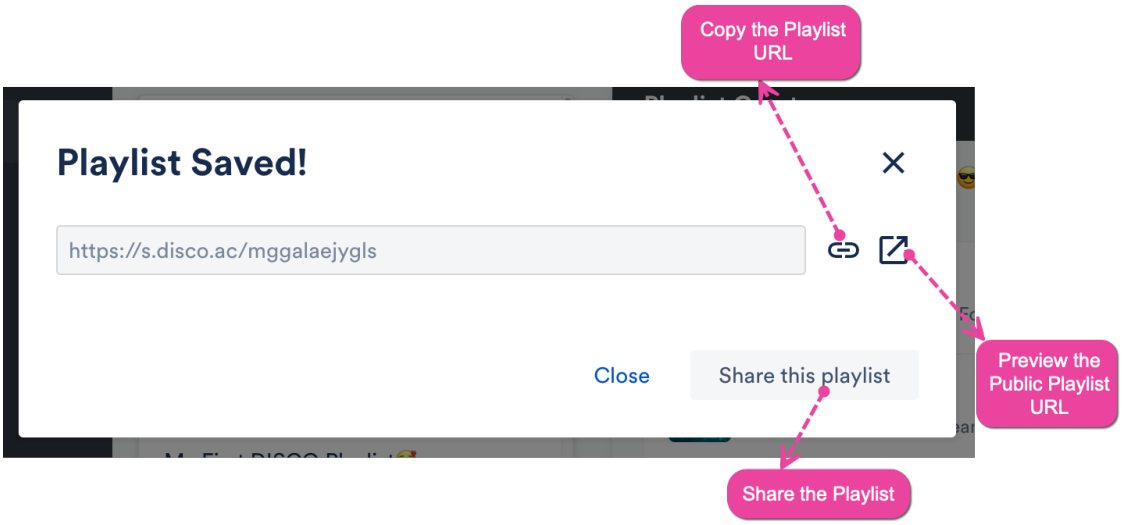

From the **Playlist Info** tab, you can give your Playlist a **Name** and enable any of the desired **Playlist Settings** (including **Content Settings, Security Settings,** or **Browse Settings**) by switching the toggles to **ON**. You can also add **Playlist tags**, or add your Playlist to a **Channel**.

From the **Presentation** tab, you can choose a design for an **Artist Page** or **Album Page**, add a **Playlist Theme**, and update some additional **Settings**, such as to **Show lyrics** on your Playlist.

If you are on a **Plus** or a **Pro** plan, you can add **Alias Metadata** as well.

> ***Note:*** *Some settings are specific to specific plans and may not be available in your DISCO.*

When you're done, click the **Save Playlist** button. Now you can preview or share your new Playlist!

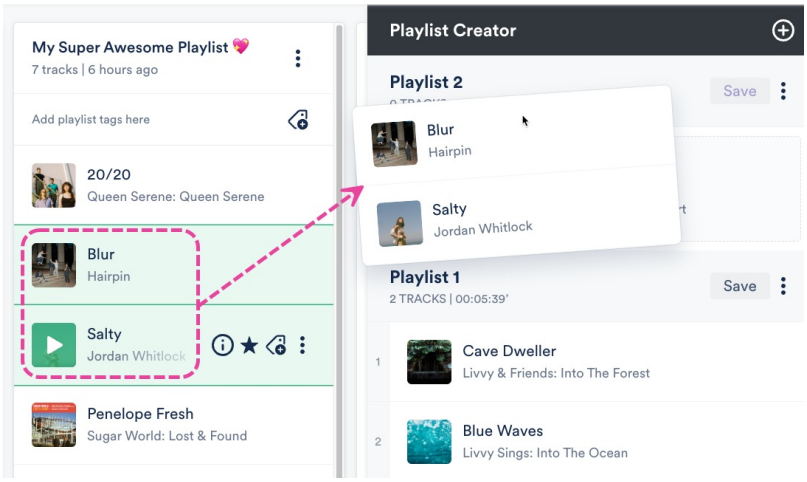

Creating multiple Playlists at once

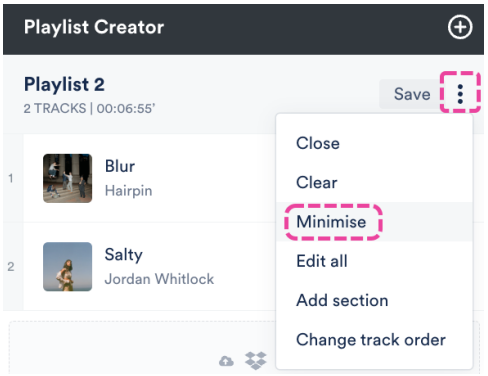

You can create multiple Playlists at the same time in the Playlist Creator! If you already have Tracks in the Playlist Creator and want to create another Playlist, click the **+** plus button.

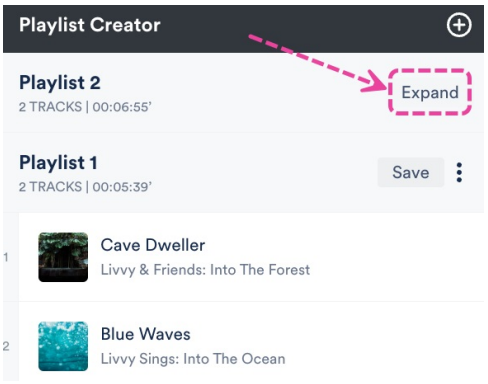

You can then upload or drag Tracks into the new Playlist, and give each Playlist a name.

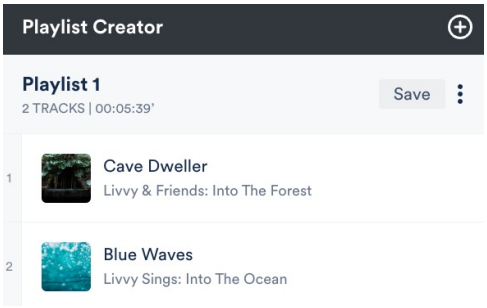

If needed, you can minimize any of the Playlists by selecting **Minimise** in the **Playlist Creator menu (⋮)**.

You can also click the **Expand** option to view the Playlist Tracklist again.

After saving one of the Playlists, it will disappear from the Playlist Creator:

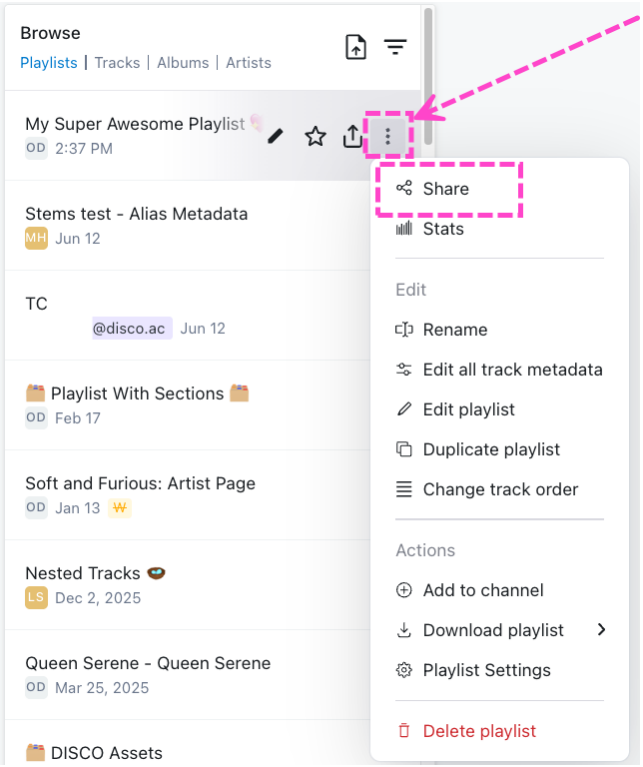

Once your Playlist is saved, it will be removed from the Playlist Creator, but it will be available in your **Browse** section under **Playlists**.

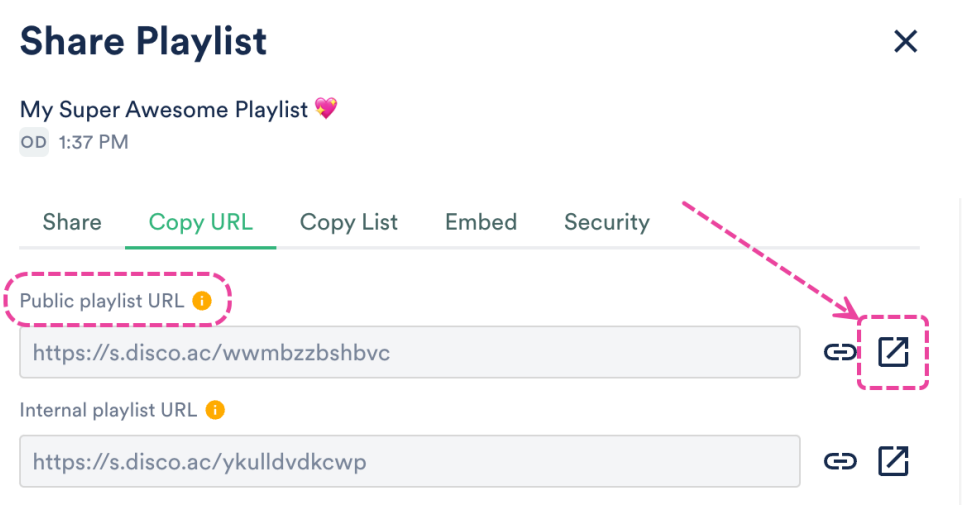

Previewing your Playlist

To access the public view of your Playlist (to see how it looks outside of DISCO):

1. Open the **Playlist Menu** (⋮).
2. Select **Share**.

3. From the **Share Playlist** menu, under the **Copy URL** tab, click the **Open in new tab** icon to the right of the **Public playlist URL**.

4. The public view of your Playlist will open in a new tab.
