Deleting Playlists

Last Modified on 10/14/2026 12:55 pm PDT

Deleting Playlists in DISCO is quick and easy.

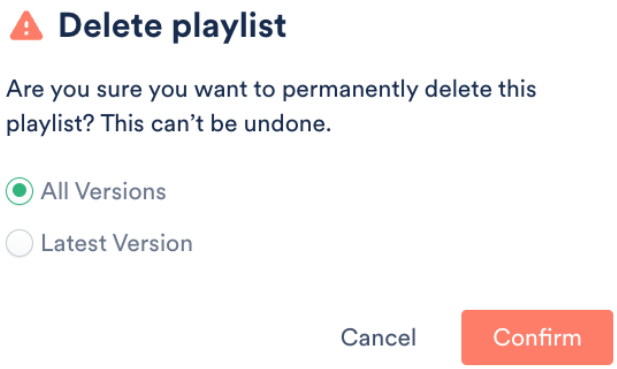

At a glance

The process differs slightly depending on how many Playlists you are deleting at once.

> ***Important:*** *Deleting a Playlist can't be undone.*

Deleting a single Playlist

1. Open the **Playlist menu (⋮)** and select **Delete playlist**.
2. In the **Delete playlist** window, choose an option:
   - **All Versions** - This will completely remove the Playlist from your DISCO.
   - **Latest Version** - Every time you make a change to a Playlist and save it, it creates a new version of the Playlist. This option will just delete *the most recently saved version* of the Playlist. Once deleted, the Playlist will revert to the version that was saved before the most recent version. Think of it like an "Undo" button.

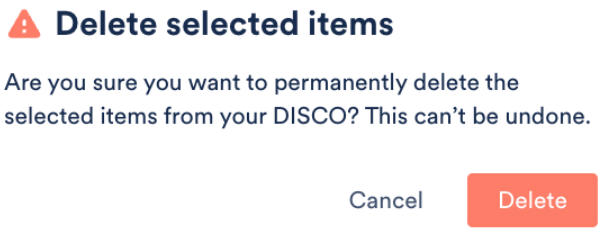

3. Click the **Confirm** button.

Deleting multiple Playlists

1. Use multi-select to select the Playlists you'd like to delete.
2. An **Edit** menu will appear at the bottom of your DISCO. Click the trash can icon to **Delete**.

3. In the **Delete selected items** window, if you are sure, click the **Delete** button.

Frequently asked questions

Does deleting a Playlist also delete its Tracks from DISCO?

No. Deleting a Playlist only deletes the Playlist; the Tracks will remain in your DISCO.
