4. From the **Save Playlist** window, select the **Presentation** tab.
5. Under **Choose a design**, select a radio button for either **Artist Page** or **Album Page**.

Customizing a Page

After creating your Page, you can add multiple customizations.

Customizations for Album Pages only

Add or update the **Album Artwork**, **Release Name (Playlist Title)**, and **Release Date**.

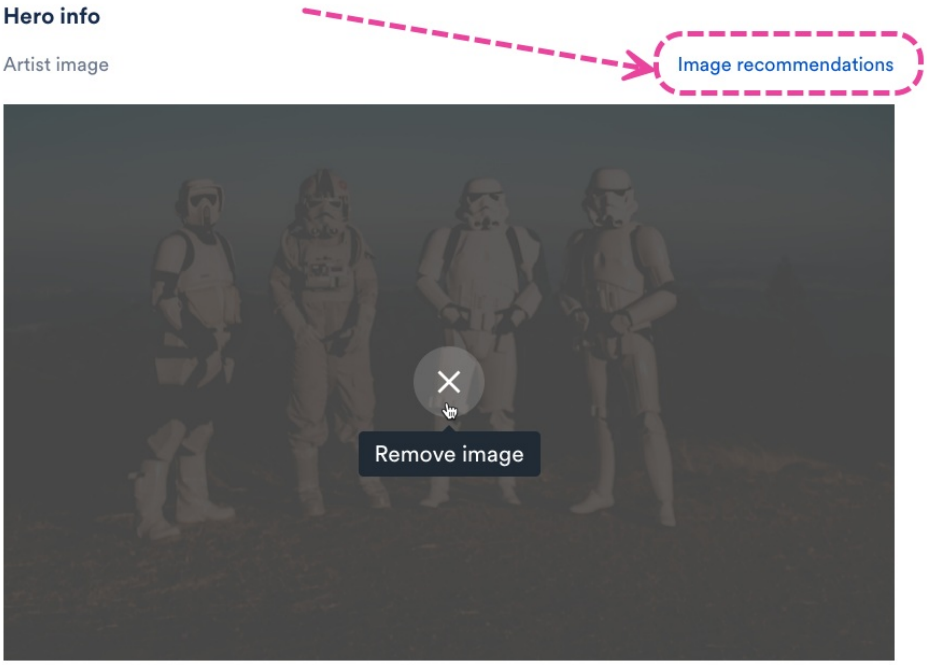

Customizations for both Artist and Album Pages

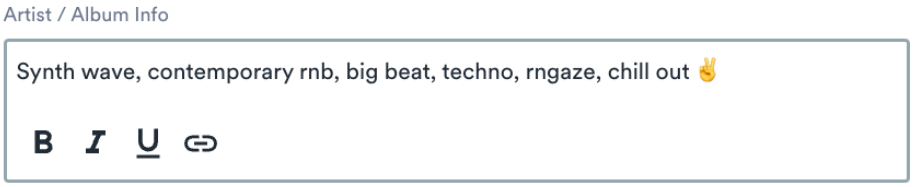

1. **Choose an artist** from the dropdown. This list contains all **Artists** in your DISCO.

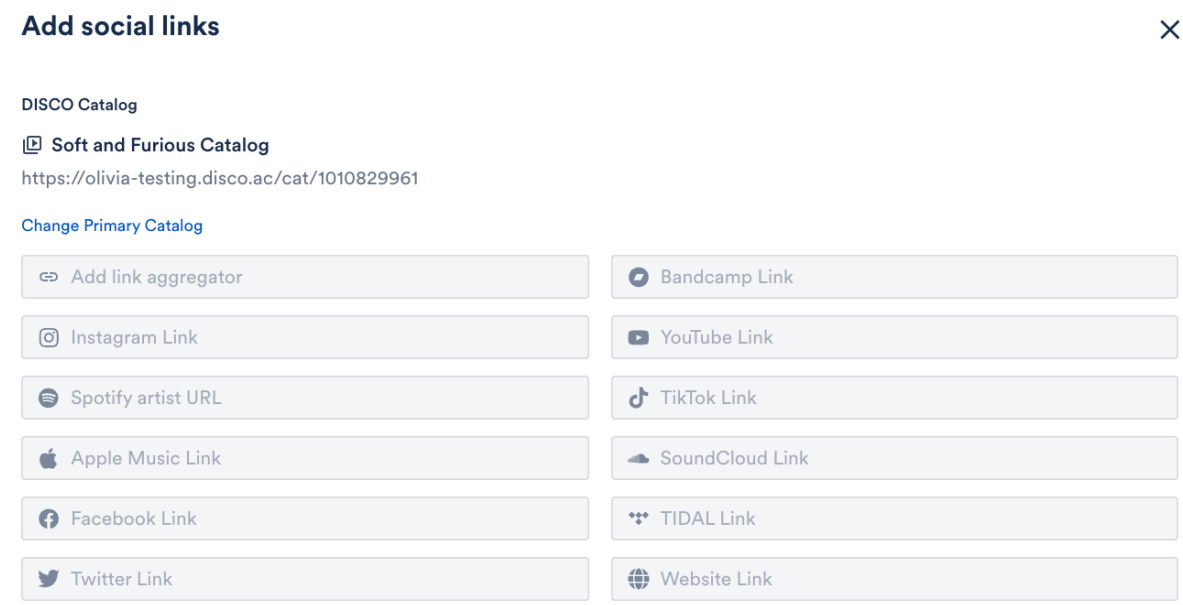

2. **Choose a Color theme**: **Dark** or **Light** by selecting one of the radio buttons.
3. Add **Hero info**, including an **Artist image** and **Artist / Album Info**.
    - For the **Artist image**, be sure to check the **Image recommendations** and this article for more details.

    - **Artist / Album Info** is a good place to add a bio or anything you want your listeners to know.

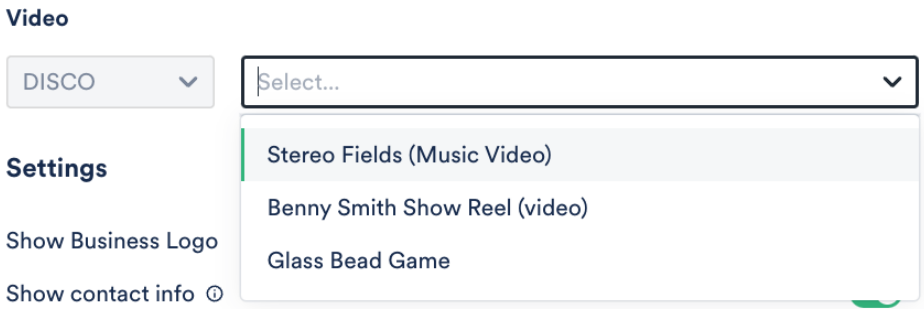

4. Add **Social Links** and add or update the link to your **Primary Catalog** by clicking **Manage social links**.

Example

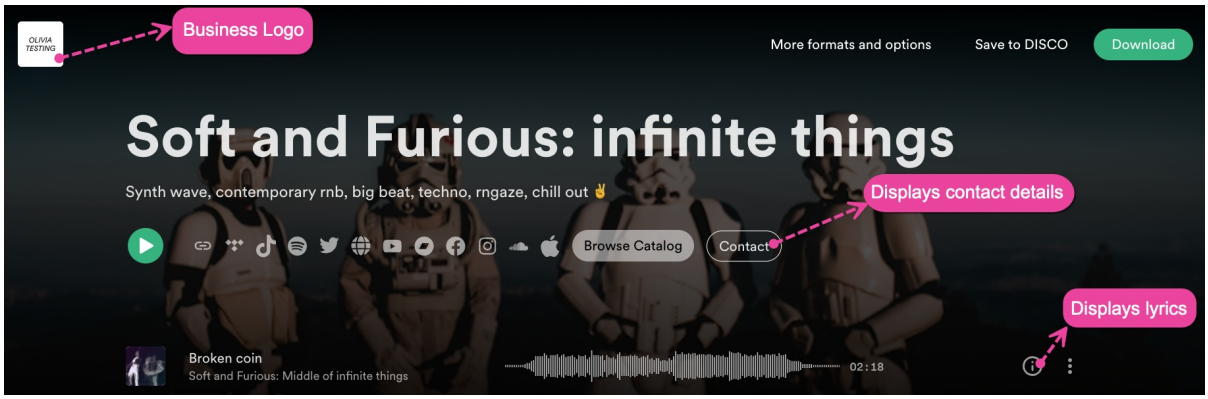

5. Under **Contents**, you'll see a list of all Tracks that will be displayed on the Page.
6. Add a **Video** using the dropdown to select a source (**DISCO**, **YouTube**, or **Vimeo**). If you select DISCO, you can then select a video from your DISCO from the dropdown. If you selected either of the other options, you can enter a URL.

7. Update your **Settings** if you'd like to **Show Business Logo**, **Show contact info**, or **Show lyrics**. To enable any of these, set the toggle to **ON**.
