Updating Track metadata

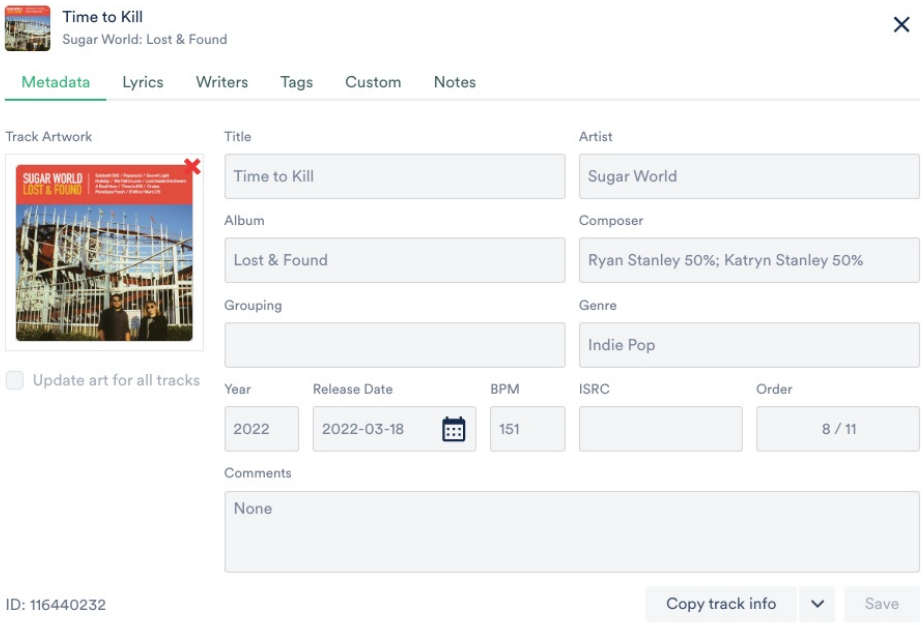

Last Modified on 10/22/2026 2:32 pm PDT

When you upload tracks to DISCO, we read every metadata field on the track, as long as the audio format (e.g. AIFF, MP3) of the track can embed metadata in a way that is readable. For more information, visit this article.

At a glance

DISCO uses the following fields to display metadata on the Track information page:

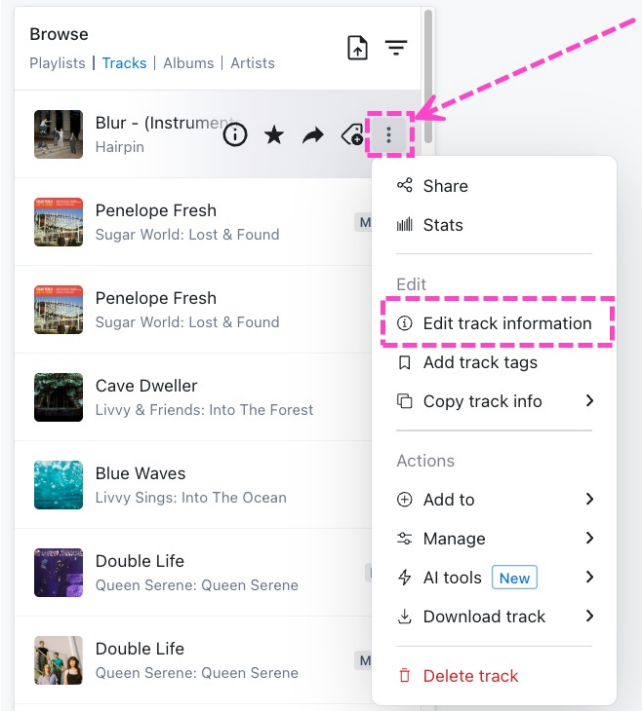

- **Track Artwork**
- **Title**
- **Artist**
- **Album**
- **Composer**
- **Grouping**
- **Genre**
- **Year**
- **Release Date**
- **BPM**
- **ISRC**
- **Order**
- **Comments**
- **Lyrics**

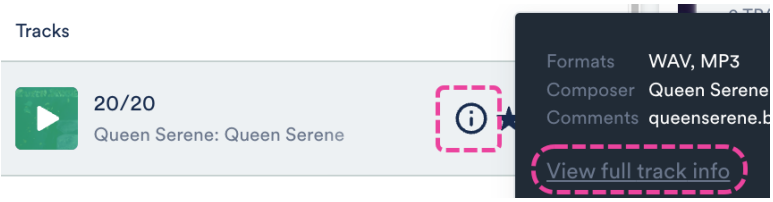

Viewing your Track metadata

You can access your metadata from the Track information page in three different ways:

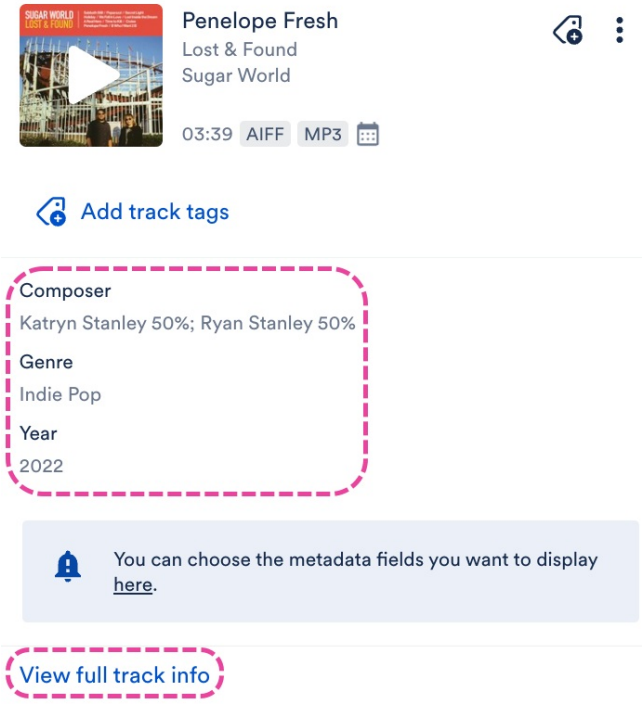

- Open the **Track menu (⋮)** and select **Edit track information**.

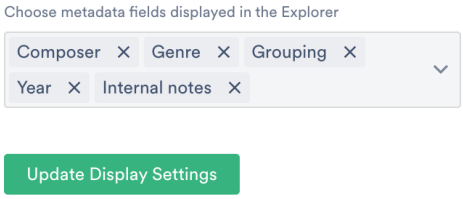

- Hover over the **'i'** icon on the Track, and select **View full track info**.

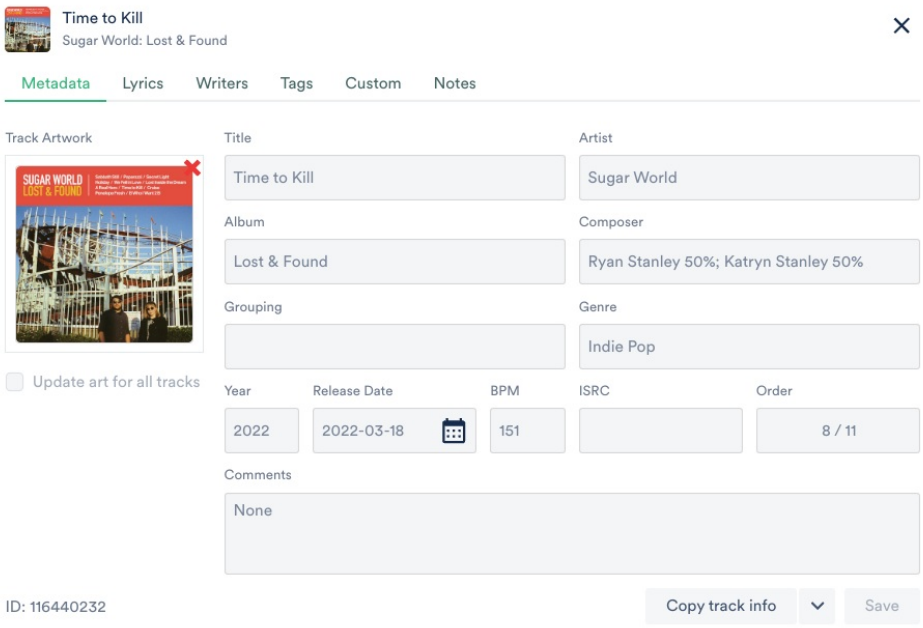

- Click on a Track to open it in the Explorer. Some* metadata fields will be displayed in the Track detail panel, and you can also click **View full track info**.

To customize which fields are displayed here, go to **Settings & Account > My Settings > Display Settings > Choose metadata fields displayed in the Explorer.*

All of the above options will open the track information page, with the **Metadata** tab selected.

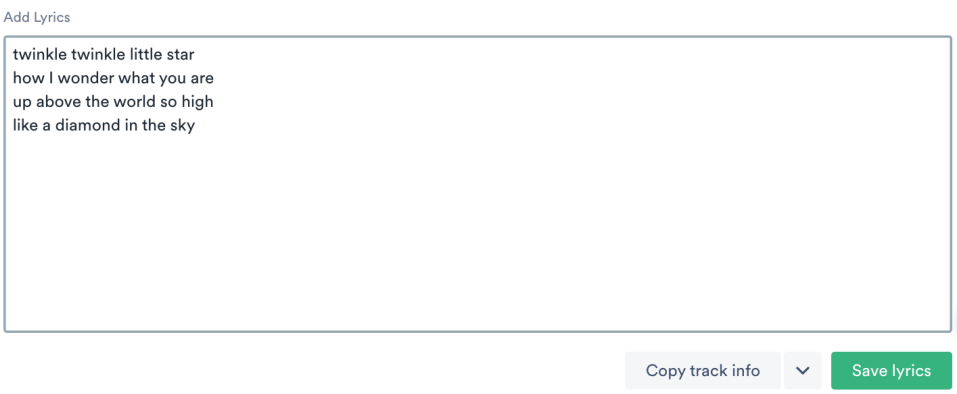

Adding and editing Track metadata

You can add and edit metadata for individual Tracks, or for multiple Tracks at once.

For single Tracks

1. Open the Track information page.
2. From the **Metadata** tab, you can add and edit: **Track Artwork**, **Title**, **Artist**, **Album**, **Composer**, **Grouping**, **Genre**, **Year**, **Release Date**, **BPM**, **ISRC**, **Order**, **Comments**.
   From the **Lyrics** tab, you can add and edit **Lyrics**.

   From the **Writers** tab, you can add and edit **Writers** and related information. You can also manage Writer Splits.
   From the **Tags** tab, you can add and manage **Track Tags**.

From the **Custom** tab, you can add and edit data from any custom fields* you may have set up.

Custom fields are a premium feature available to users on our **Pro plan and above.*

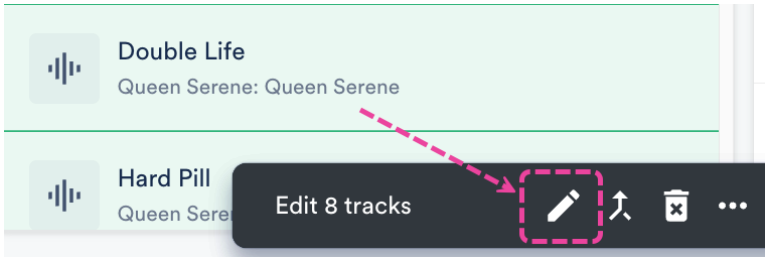

From the **Notes** tab, you can view and add **Notes**.

3. Click the **Save** button.

For multiple Tracks

***Note:** Using multi-select to edit metadata of nested Tracks is not currently supported. However, if you use the **Edit all track metadata** option from the **Playlist menu (⋮)** instead, any non-Title metadata edits will be written to all main and nested Tracks in the Playlist -- this includes Writer Splits, Notes, and Tags too!*

1. Use multi-select to select multiple Tracks.
2. In the **Edit** menu at the bottom of the screen, click the pencil.

3. This will open the Track information page and allow you to edit multiple Tracks at once.
4. Click the **Save** button.
