Disabling and re-enabling Playlist share URLs

Last Modified on 10/15/2026 1:23 pm PDT

Users on our **Plus** plan and above have the option to disable individual share URLs for Playlists so they'll no longer be accessible to recipients.

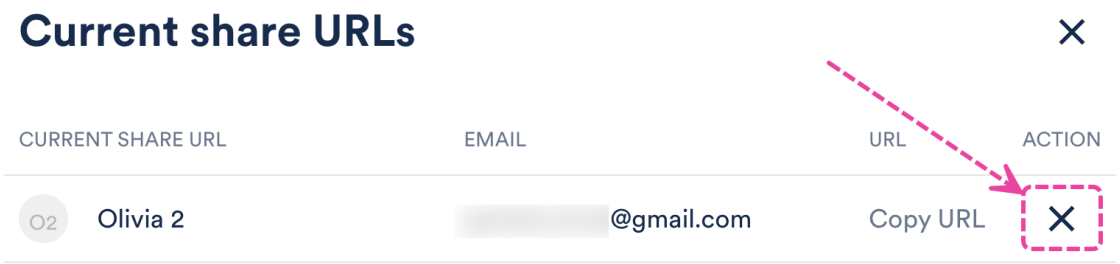

At a glance

This can *only* be done on share URLs you've generated by emailing playlists directly, or by assigning URLs to specific Contacts. *Public playlist URLs cannot be disabled.*

Disabling a Playlist share URL

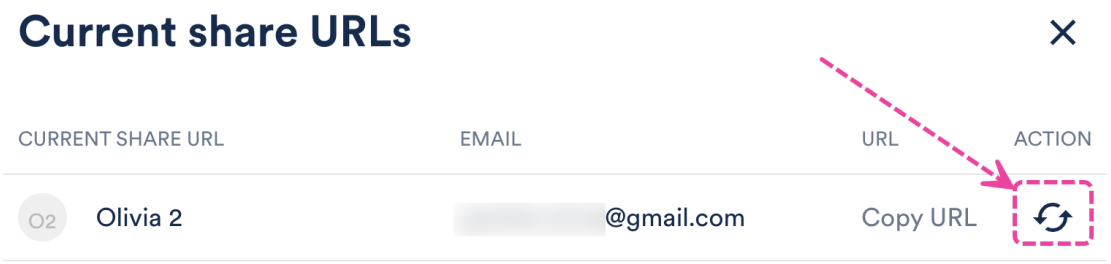

1. Open the **Playlist menu (⋮)**.
2. Select **Share**.
3. In the **Share Playlist** menu, from the **Share** tab, scroll to the bottom where it says "View current Share URLs and Access Stats."
4. Click the **Share URLs** link.
5. A list of **Current share URLs** will appear. Click the **X** under the **Action** column to the right of the share URL you'd like to disable.

6. You'll be asked to confirm that you want to disable the link. Click the red **Confirm** button.

Re-enabling a disabled Playlist share URL

1. Open the **Playlist menu (⋮)**.
2. Select **Share**.
3. In the **Share Playlist** menu, from the **Share** tab, scroll to the bottom where it says "View current Share URLs and Access Stats."
4. Click the **Share URLs** link.
5. A list of **Current share URLs** will appear. Click the refresh icon under the **Action** column to the right of the share URL you'd like to re-enable.

Frequently asked questions

How soon after disabling a URL will it become inaccessible?

Once you disable a URL, it will no longer load for recipients. If a recipient had the Playlist page open already before you disabled it, that page will be invalidated and a "page unavailable" message will appear within 10 minutes.
